

Tenor Saxophone

SIGNATURE

Generosity and breadth of sound

The tenor Signature is a reinvention of the Series III model, which has been a favorite of numerous saxophonists for its acoustic qualities and its ergonomic comfort since its launch in 1995. With an increase in the diameter of the neck receiver, this new model offers rare precision and a full sound.

Strongly inspired by the Series III, its ergonomics is suitable for all musicians, regardless of their ability level and musical genre. Equipped with a new neck receiver system with 3-point tightening developed for the Supreme model, the tenor Signature ensures perfect homogeneity of sound.
